Path: My Account > Communication > Notification History

Notification History is your personal log of all the in-app alerts Campus has sent you. Think of it as the full inbox behind the bell icon in the top navigation bar. When you click that bell, you see a small dropdown with your most recent notifications. Notification History is the "see everything" version of that same list, showing your last 200 notifications in one place.

●	There were 2/2 accounts successfully disabled for portal.	Wed, 9/9/26	>
●	The curriculum import "Long File Name Python", submitted at 9:56 AM on 07/09/2026, completed at 9:59 AM on 07/09/2026. This curriculum is now available.	Thu, 7/9/26	>
●	There was an error importing the curriculum called "lgt-u", submitted at 9:45 AM on 07/09/2026. There was an error with the imported file. Please try again.	Thu, 7/9/26	>
●	The curriculum import "lgt-e", submitted at 9:45 AM on 07/09/2026, completed at 9:49 AM on 07/09/2026. This curriculum is now available.	Thu, 7/9/26	>
●	There was an error importing the curriculum called "all-u", submitted at 9:45 AM on 07/09/2026. There was an error with the imported file. Please try again.	Thu, 7/9/26	>
●	There was an error importing the curriculum called "dq-u", submitted at 9:45 AM on 07/09/2026. There was an error with the imported file. Please try again.	Thu, 7/9/26	>

Things to consider

- For parents and students, your district controls which notification categories are active via Portal Display Options. If grades are hidden in Portal, grade notifications will not have a clickable link even if they appear in the list. Your district admin configures this.
- Each notification type has a default subscription, meaning users are automatically opted in. In some cases, users can unsubscribe from specific types. If unsubscribed, new notifications of that type won't be generated going forward, but notifications already in the history remain visible.
- Some notifications are specific to the student or parent context. For example, Assignment Reassign notifications are delivered only to students, not to parents. The system filters these based on the logged-in user's context.
- If notifications aren't appearing, the relevant product (Campus Learning, Food Service, etc.) isn't enabled at your district; the triggering events haven't occurred yet; Portal Display Options have the corresponding category turned off; or you may have unsubscribed from that notification type.

What can appear here?

The tables below explain all the notifications that can appear in your notification history, including what triggered them and who can see them.

Campus Learning / Instruction

Notification	What triggered it	Who can see it	Generating tool
Assignment Score Event	A teacher scores and publishes a student's assignment	Students, parents	Grade Book <i>Instruction > Grades > Grade Book</i>
Assignment Reassign Event	A teacher reassigns an assignment to a student	Students only	Grade Book <i>Instruction > Grades > Grade Book</i>
Grade Event	A grade is posted or updated in Gradebook	Students, parents	Grade Book <i>Instruction > Grades > Grade Book</i>
Section Feed Post Event	A new post is made in a class/section feed	Teachers, students, parents	Section Feed (Campus Learning) <i>Instruction > Section Feed</i>
Section Feed Reply Event	Someone replies to a section feed post	Teachers, students, parents	Section Feed (Campus Learning) <i>Instruction > Section Feed</i>
Campus Learning Event	A discussion post is flagged (section feeds or assignment discussions)	Teachers	Grade Book / Section Feed <i>Instruction > Grades > Grade Book</i>
Curriculum Import	A curriculum import job completes	Teachers/curriculum admins	Curriculum Importer <i>System Settings > Data Utilities > Curriculum Importer</i>

Groups (Campus Learning - Groups Feature)

Group notifications appear only if Campus Learning is licensed for your district and the Groups feature toggle is enabled. If it is not, group notification links are suppressed even if the notification record exists.

Notification	What triggered it	Who can see it	Generating tool
--------------	-------------------	----------------	-----------------

Notification	What triggered it	Who can see it	Generating tool
Group User Agreement Request Event	A user requests to join a group that requires acceptance of the agreement	Group owners and admins	Groups <i>Communication > Groups Management > Groups</i>
